

Making Buildings That Make Our Builders The Best.

Institutional/Educational

In recent years, educational facilities have significantly increased their choice to use metal building construction due to cost-efficiency and the ability to fully integrate and customize according to even the strictest requirements. MESCO metal building construction can be expanded by simply removing one or more walls, erecting new framework, and adding matching wall and roof covers. The flexibility greatly reduces the time and inconvenience associated with expansions or additions to traditional construction. Metal buildings can be simple and basic or can be detailed with sweeping vistas of glass or dramatic overhangs that adapt well to all types of educational environments including auditoriums, recreational buildings, churches and other institutional buildings.

MESCO prides itself on offering the following features for all institutional and educational facilities:

- Aesthetically pleasing appearance
- Standard and custom design options
- Fast and economical construction
- Ease of expansion
- Ongoing durability
- Reduced maintenance costs
- Long-term energy savings
